

COMPLETION ENGINEERS, INC.  
"A Professional Engineering Firm"

To Whom It May Concern:

The purpose of this letter is to commend Mike Allen for his performance as Second Captain on the Lablift III a 200-ton liftboat. He was a pleasure to work with and has exceptional communication skills. Mike was always willing to make sure that our work environment was not only safe but also as enjoyable as possible while offshore. His positive attitude was transmittable and created a teamwork environment that is uncommon among boat crews. I highly recommend Mike for future jobs and would enjoy working with him again soon.

Best wishes,

Wayne Ducote
